ABOUT

Master's student in Biomedical Engineering, expected to graduate in July 2026, with over two years of research experience in physiological signal processing. Skilled in analyzing electromyography (EMG) and electrocardiography (ECG) signals, statistical analysis, and Python-based signal processing. Interested in signal processing, data analytics, and medical devices, with a strong willingness to learn and adapt to new challenges.

Technical Skills

Python

C

Signal Processing

Statistical Analysis

Microsoft Office

Dual-Core Processing

Basic PCB Desing

Research Interests

Physiological Signal Processing

Embedded System

PCB Desing

Rehabilitation

Medical Device

Education

2025 - Now

Master of Engineering - Biomedical Engineering

Srinakharinwirot university - GPAX: 3.65

2020 - 2025

Bachealor of Engineering - Biomedical Engineering

Srinakharinwirot university - GPAX: 4.00

Publication

Evaluation of Mother Wavelets for ECG Artifacts Suppression in Diaphragmatic EMG Using Singlelevel Discrete Wavelet Transform

18th International Conference on Knowledge and Smart Technology (KST2026)

Author

Supanun Chitmeta; Sauwaluk Dacha; Weerayot Aramphianlert

A Development of an Embedded System Software for IMU Sensor Data Logging During Clinical Assessment by Using 6-Minute Walk Test

16th Biomedical Engineering International Conference (BMEiCON2024)

Author

Supanun Chitmeta; Phusanisa Premying; Chamaiporn Sukjamsri; Weerayot Aramphianlert

Research Projects

Master's Thesis

Wavelet-Based ECG Artifact Removal from Non-Invasive Diaphragmatic EMG during Breathing Exercise

Senior Project

A Comparative Study of Mother Wavelets for ECG Removal in Non-invasive Diaphragm EMG during Breathing Exercise

Mini-Senoir Project

A development of an embedded system software for IMU sensor data logging (Duo-core processing) during clinical assessment by using 6-minute walk test

Analog-to-digital PCB Desing

Design and develop a printed circuit board (PCB) for an analog-to-digital signal acquisition circuit intended for electromyography (EMG) recording.

Depp learning - Class project

Optimization of Parameters for Brain Tumor Classification Using Convolutional Neural Networks (CNNs)

PM 2.5 Detector

Developed an IoT-based air quality monitoring system that captures PM2.5 sensor data and triggers real-time mobile alerts when levels exceed predefined thresholds.

Experience

- Mar-Apr 2026 Physiological Signal Laboratory, Srinakharinwirot U.
Teaching Assistant
- Feb 2026 HRH Princess Maha Chakri Sirindhorn Medical Center
Air Quality Assessment Intern
► Assisted in environmental data collection
- Feb 2025 HRH Princess Maha Chakri Sirindhorn Medical Center
Air Quality Assessment Intern
► Conducted air quality and environmental quality assessments in hospital environments
- Aug-Dec 2024 Motion Capture System Laboratory, Srinakharinwirot U.
Research Assistant
- Jun-Jul 2024 Xovic Company Limited - Infusion pump Team
Biomedical Engineering Intern
► Conducted acceptance testing for infusion pumps prior to hospital delivery
- Jun-Jul 2023 Police General Hospital — Medical Equipment Center
Biomedical Equipment Engineering Intern
