SUMMARY

Currently seeking opportunities in Data Analysis, Biomedical Signal Processing, Research, and Medical Device-related roles. Experienced in a medical device internship, along with over 3 years of research experience covering data collection, data analysis, presentation of findings, and systematic analytical thinking. An eager learner who enjoys exploring new knowledge, committed to applying what I've learned and continuously developing my skills to support organizational growth.

TECHNICAL SKILLS

- **Programing:** C (Free-RTOS), Python (NumPy, Pandas, SciPy, Matplotlib)
- **Data Analysis:** Statistical Analysis, Signal Processing, Data Visualization
- **Basic PCB Design**
- **Tools:** Microsoft Office, Excel, Altium Designer, Solid Works

EDUCATION

Master of Engineering — Biomedical Engineering | Srinakharinwirot University | 2025 – 2026 (GPAX 4.00)

Bachelor of Engineering — Biomedical Engineering | Srinakharinwirot University | 2020 – 2025 (GPAX 3.65)

RESEARCH & PROJECT EXPERIENCE

Master's Thesis — Wavelet-Based ECG Artifact Removal from diEMG Signals

Renue Lab, Srinakharinwirot University | 2025 – 2026

- Developed an algorithm to remove ECG artifacts from non-invasive diaphragmatic EMG signals using Wavelet Transform
- The proposed algorithm effectively removed ECG artifacts from EMG signals and demonstrated superior performance compared with conventional high-pass filtering and gating methods.

Senior Project — Comparative Study of Mother Wavelets for ECG Removal

Renue Lab, Srinakharinwirot University | 2024 - 2025

- Selected the mother wavelet functions for ECG artifact removal from non-invasive diaphragmatic EMG signals using Single Level Discrete Wavelet Transform

PCB Design Project — Course Project

Srinakharinwirot University | 2024

- Designed and implemented analog and digital circuits for acquiring EMG signals

Deep Learning Project — Course Project

Srinakharinwirot University | 2024

- Fine-tuning the optimal parameters for the model, including the number of epochs, activation function, and input image size

Mini-Senior Project — Embedded System for IMU Sensor Data Logging

Renue Lab, Srinakharinwirot University | 2024

- Develop a wearable device for recording data during the 6-minute walk test (6MWT)

P.M. 2.5 Detector — Course Project

Srinakharinwirot University | 2024

- Development of a PM2.5 Monitoring and Alert System

EXPERIENCE

Teaching assistant

Physiological Signal Lab, SWU · Mar–Apr 2026

Air Quality Assessment Assistant

HRH Princess Maha Chakri Sirindhorn Medical Center · Feb 2026

- Assisted in environmental data collection

Air Quality Assessment Assistant

HRH Princess Maha Chakri Sirindhorn Medical Center · Feb 2025

- Conducted air & environmental quality assessments in hospital settings

EXPERIENCE (CONTINUES)

Research assistant

Motion Capture System Lab, SWU · Aug–Dec 2024

Biomedical engineering intern

Xovic Co., Ltd. – Infusion pump team · Jun–Jul 2024

- Conducted acceptance testing for infusion pumps prior to hospital delivery

Biomedical equipment engineering intern

Police General Hospital – Medical Equipment Center · Jun–Jul 2023

PUBLICATIONS

Evaluation of Mother Wavelets for ECG Artifacts Suppression in Diaphragmatic EMG Using Singlelevel Discrete Wavelet Transform

18th International Conference on Knowledge and Smart Technology (KST2026)

Author: **Supanun Chitmeta**; Sauwaluk Dacha; Weerayot Aramphianlert

A Development of an Embedded System Software for IMU Sensor Data Logging During Clinical Assessment by Using 6-Minute Walk Test

16th Biomedical Engineering International Conference (BMEiCON2024)

Author: **Supanun Chitmeta**; Phusanisa Premying; Chamaiporn Sukjamsri; Weerayot Aramphianlert
